(Mr. Haycock) has constructed and in working order a HORSE RAILWAY

six miles and a quarter in length from his mines to the Gatineau River. Five thousand tons of ore has been mined, and arrangements are now being made to put up a series of blooms to be in operation by January next. The ore already mined will then be smelted.

We publish today the prospectus of the Ottawa Iron and Steel Manufacturing Company, whose head office is in this city. The company has been formed for the purpose of working the magnificent iron mine known as the Haycock Iron Location. There is nothing hazardous in this enterprise, the value of the property being well known. The mine has been open and worked for some time. A tramway has been constructed for the transportation of the ore to the Gatineau River and --

4. Ten acres in lot 2 on the 6th range of Hull, on the left bank of the River Gatineau which has been secured partly to serve as a storing place and loading ground for shipping the ore, but chiefly as a convenient site for the erection of Furnaces. This area is connected with the mineral or iron area proper by a ramway of 6 1/4 miles in length. This tramway, of three feet gauge, has been very solidly constructed and is now in complete working order. It runs for a short distance through the Haycock property and is then continued along the town line between Hull and Templeton on to the furnace site in the Gatineau.

In addition to the 6 1/4 miles of tramway in complete running order with full right of way from the ore beds to the furnace site -- 80 tramway cars.

More.
